SUPPLEMENTARY INFORMATION:

I. Abstract

The Office of International Affairs, Trade, and Commerce of the National Marine Fisheries Service requests renewal of an existing information collection.

The 1982 Convention on the Conservation of Antarctic Marine Living Resources (Convention) established the Commission for the Conservation of Antarctic Marine Living Resources (CCAMLR) for the purpose of protecting and conserving the marine living resources in the waters surrounding Antarctica. The Convention is based upon an ecosystem approach to the conservation of marine living resources and incorporates standards designed to ensure the conservation of individual populations and species and the Antarctic marine ecosystem as a whole.

The United States (U.S.) is a contracting party to the Convention and a member of CCAMLR and the Scientific Committee established by the Convention.

On November 8, 1984, the President signed Public Law 98–623, the Antarctic Marine Living Resources Convention Act (the Act). The Act directs and authorizes the United States to take actions necessary to meet its treaty obligations as a contracting party to the Convention. The regulations implementing the Act are at 50 CFR part 300, subpart G. The record keeping and reporting requirements at 50 CFR part 300 form the basis for this collection of information. The reporting requirements included in this collection concern CCAMLR Ecosystem Monitoring Program (CEMP) activities, scientific research in the Convention area, U.S. vessel permit applicants and/or harvesting vessel operators, and U.S. importers, exporters, and re-exporters of AMLR.

U.S. regulations require U.S. individuals engaged in AMLR harvesting, transshipping, and importing or entering and/or conducting activities in a CEMP site to apply for and hold a permit for such activities. Individuals involved in certain scientific research in the Convention area are required to report information.

Members of CCAMLR are required to provide, in the manner and at such intervals as may be prescribed, information about harvesting activities, including fishing areas and vessels, so as to enable reliable catch and effort statistics to be compiled.

As part of U.S. obligations to monitor and control the import, export, and re-export of Antarctic marine living resources, NOAA requires dealers to submit applications for pre-approval certifications of imports of frozen Patagonian and Antarctic toothfish (also referred to as Chilean sea bass) and applications for re-exports of these species.

The collection is necessary in order for the United States to meet its treaty obligations as a contracting party to the Convention.
